

VIKAS KUMAR

Senior Full Stack Developer (MERN / PERN | Microservices)

Mobile: +91 9304047599 | E-mail: vy24754@gmail.com | LinkedIn | Portfolio | Location: Hyderabad

CAREER OBJECTIVE

Senior Software Engineer with 4.10+ years building full-stack systems on the MERN stack and Node.js microservices. Proven ability to architect large-scale migrations and lead cross-functional teams across fintech, e-commerce, and government/PSU sectors, with deep expertise in scalable backend systems and DevOps practices.

TECHNICAL SKILLS

- Languages: JavaScript, TypeScript, C++, Java
- Backend: Node.js, Nestjs, Express.js, Microservices, REST/GraphQL APIs, Sequelize ORM, BullMQ/RabbitMQ
- Frontend: React.js, Next.js, Redux, Tailwind CSS, Material UI, Shadcn UI, Knockout.js, Keystone.js
- Databases: MongoDB, MySQL, Oracle, PostgreSQL, MSSQL, Redis
- Tools & Platforms: Git, AWS, Firebase, Docker, CI/CD, Jenkins, Linux

WORK EXPERIENCE

Senior Node.js Developer | KeyPoint Technologies India Pvt. Ltd. (Nov 2025 – Present)

Project: GailGas PNG (Lead Backend Architect)

- Architected and led the end-to-end migration of a large-scale .NET monolith to a Node.js microservices architecture spanning 22 regional databases and a shared common database, directing a team of 5+ developers.
- Designed a BullMQ/Redis job processing and notification infrastructure with FCM push delivery and retry/backoff queue strategies, and directed schema migrations and performance optimization (composite/filtered indexing, query tuning, SQL Agent automation) across all 22 regional databases.
- Owned migration of core business domains including billing/invoicing, payment processing (cheque/POS), authentication, role management, and customer notification systems, establishing reusable coding standards adopted team-wide.

Project: Green Credit Portal

- Led backend design and development of the Green Credit Portal using Node.js microservices, improving system scalability by 40%.

Senior Software Development Engineer | Thermopharm Pvt Ltd (June 2025 – Oct 2025)

Project: HVAC Attendance & Workforce Management Application

- Architected full-stack workforce management application leveraging Next.js for the frontend and Node.js for web and mobile applications, enhancing operational efficiency.
- Spearheaded an AI-powered selfie-based attendance and leave management system, streamlining work-hour calculations and employee tracking, and added task management and sites/project tracking to improve team productivity.
- Integrated push notifications and file/log storage, ensuring seamless and uninterrupted operations.

Software Development Engineer | Anjani Creations (Oct 2024 – June 2025)

Project: Microfinance Management Software | Finmintra & NGO Management Software

- Engineered a comprehensive full-stack platform for efficient management of customer loans and EMIs, enhancing financial workflows.
- Integrated APIs for direct EMI collection from customer bank accounts, optimizing and automating payment processes.
- Streamlined database operations, enhancing transaction logging efficiency and automating EMI debit notifications via SMS and email.

Software Development Engineer | Raysteeds Infotech Pvt Ltd. (Nov 2021 – Sept 2024)

Projects: Top Ten Electronics, NAVGAT Survey Reporting (IRClass), Swachh Sagar (IRClass), Eplan (IRClass), Yall (Dating App), Inventory Management System (IRClass)

- Amplified e-commerce sales by 70% through strategic SEO techniques in Next.js, achieving over \$100,000 in monthly revenue with a portfolio exceeding 50,000 products.
- Developed scalable RESTful API services using Node.js and Express.js with a React.js frontend, and reduced mediation/administrative issues by 50% in the Port Reception Facility System.

Software Engineer - Intern | Raysteeds Infotech Pvt Ltd. (June 2021 - Oct 2021)

- Worked as a full-stack developer across 3 parallel company projects, building React.js frontends, Node.js backends, MongoDB integrations, Material UI/Semantic UI interfaces, and AWS S3/SES services.

PERSONAL PROJECT

JS Playground | React, Vite, Node.js, Express, PostgreSQL, Drizzle ORM

- Built a full-stack JavaScript playground with Monaco editor, browser-based code execution, DSA problems, snippet management, and npm package support.
- Structured the app as a pnpm monorepo with OpenAPI-driven contracts, Zod validation, Drizzle ORM, and generated React Query hooks.

Realtime Chat Apps | [weblink](#)

- Built realtime chat apps with video/voice calling and file sharing functionality.

EDUCATION

- B.Tech in Computer Science — GRD IMT Dehradun, UTU | 2017–2021
